Background

Ducks Unlimited got its start in 1937 during the Dust Bowl when North America's drought-plagued waterfowl populations had plunged to unprecedented lows. Determined not to sit idly by as the continent's waterfowl dwindled beyond recovery, a small group of sportsmen joined together to form an organization that became known as Ducks Unlimited. **Its mission: habitat conservation.**

Thanks to decades of abiding by that single mission, Ducks Unlimited is now the world's largest and most effective private waterfowl and wetlands conservation organization. DU is able to multilaterally deliver its work through a series of partnerships with private individuals, landowners, agencies, scientific communities and other entities.

Waterfowl are not the only beneficiaries of DU's habitat work. Wetlands improve the overall health of our environment by recharging and purifying groundwater, moderating floods and reducing soil erosion. Wetlands are Nature's most productive ecosystems, providing critical habitat to more than 900 wildlife species and invaluable recreation opportunities for people to enjoy. The United States alone has lost more than half of its original wetlands and continues to lose more than 80,000 acres of the wetlands most important to wildlife each year.

Membership

Ducks Unlimited is a grassroots, volunteer-based organization. Its members are conservationists and outdoor enthusiasts who live throughout the United States, Canada and Mexico.

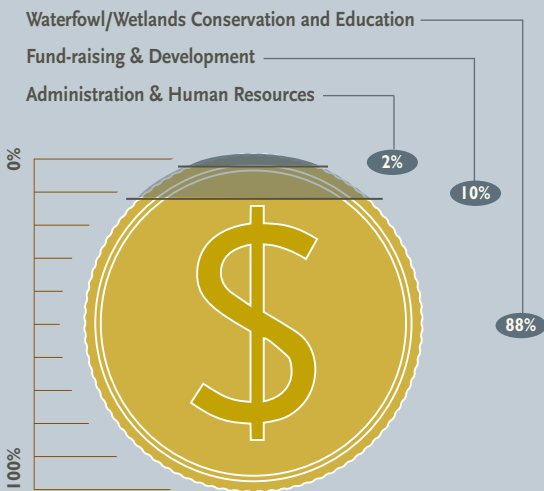

For the fiscal year ending June 30, 2008, DU volunteers hosted more than 4,500 grassroots fund-raising events such as member and sponsor banquets, shooting and fishing tournaments and golf outings. Event dollars represent some of DU's most important sources of revenue. Since event dollars are typically unrestricted, DU is able to spend these funds in our highest priority areas and use them to leverage additional funds from other sources. Recently, DU leveraged an average of six additional dollars for every net unrestricted dollar raised.

During the past fiscal year, **88 percent** of DU's expenditures were converted directly to conservation work. This habitat is needed desperately by ducks, geese and other wetland-dependent wildlife to survive.
